

5 x 80W RGBW Focus Tornado Moving Bar

DMX AND CONTROL REFERENCE - EXCERPT

This edition contains the model-specific operation and DMX reference page from the associated product guide. The reference page is reproduced in its existing layout, with all stated mode and firmware limitations retained.

This is a control-reference excerpt, not a complete installation or operating manual. It does not specify an operating-temperature range, power connection rating or approved rigging design. Confirm those items for the supplied fixture before installation.

Match the console patch to the actual fixture mode. Modes shown as manual-listed or unverified remain subject to the confirmation notes printed on the following page.

2. Operation, Menu and DMX Modes

Use MENU to enter functions, UP/DOWN to edit and ENTER to save. Current manuals and fixture files fully cover 28CH and 85CH.

28CH	Grouped motion, focus, RGBW main light, RGB halo, effects and function channel
85CH	Independent movement, focus, RGBW and halo pixel control for five heads
92CH	Published only in the supplied TOTAL D4; confirm the console profile before use

COMMISSIONING

Secure the fixture and safety cable; verify the nameplate, earth and cabling; connect power and DMX; select 28CH or 85CH and a start address; then test five heads, focus, RGBW main light, RGB halo, dimming, strobe and reset.

Fixture authority: use the current-product fixture file matching the selected mode; never copy channel data from another product.
