

12 x 60W Thousand-Hand Guanyin Creative Effect Light

DMX AND CONTROL REFERENCE - EXCERPT

This edition contains the model-specific operation and DMX reference page from the associated product guide. The reference page is reproduced in its existing layout, with all stated mode and firmware limitations retained.

This is a control-reference excerpt, not a complete installation or operating manual. It does not specify an operating-temperature range, power connection rating or approved rigging design. Confirm those items for the supplied fixture before installation.

Match the console patch to the actual fixture mode. Modes shown as manual-listed or unverified remain subject to the confirmation notes printed on the following page.

2. Operation, Menu and DMX Modes

MENU enters or returns, UP/DOWN changes parameters and ENTER confirms. The manual menu lists CH20, CH53, CH101, CH155, CH169A, CH169B and CH179.

20CH	Fully verified by all five supplied fixture files; includes Y motion, speed/modes, background, dimmer, shutter, focus/zoom, function and RGBW.
53 / 101 / 155CH	Manual-recorded expanded modes; no separate supplied fixture file is available for these footprints.
169A / 169B / 179CH	Manual-recorded high-depth per-head modes; no separate supplied fixture file is available for these footprints.

COMMISSIONING

Secure the fixture and safety cable; verify AC power, grounding and cabling; connect power and DMX; select mode and address; test all twelve Y axes, focus/zoom, RGBW, dimming and strobe.

Fixture note: two MA XML, two D4 and one R20 are preserved. The XML pair is byte-identical but remains as two distinct source files; supplied fixture mappings only substantiate 20CH.
